Subject: Miner County, SD: FEMA Flood Risk Review (FRR) Meeting June 2020 - Please Respond

Hello Bob,

I hope this note finds you safe and well in these challenging times.

As you may know, Miner County is currently involved in **FEMA's Risk Mapping Assessment and Planning (Risk MAP)** process to update flood risk information, maps, and tools. Our next step is to schedule a **Flood Risk Review (FRR) Meeting** with your community's officials (intended for June 2020). The goal of the FRR Meeting is to provide an opportunity to your community officials to review and give early feedback on draft versions of the preliminary flood maps (FIRMs).

Traditionally, we conduct the FRR Meetings in-person with each community. Considering the recent [coronavirus \(COVID-19\) pandemic](#), and as a preventive action to reduce risk - we are looking for your feedback on the following options:

- **Virtual Meeting:** Conduct the FRR Meeting virtually in June 2020
- **In-Person Meeting:** Reschedule the FRR Meeting to a date TBD

I will follow up this email with a phone call to discuss.

Thank you,

Sam Bugg

QUESTIONNAIRE

South Dakota Community Capabilities

Introduction

In the effort to combat the impacts of COVID-19, FEMA Region VIII is determined to continue to provide support and quality customer service for South Dakota communities during these unprecedented times. The following questions will help us better understand your community's capabilities for possible virtual meetings. As you may know, virtual meetings have been identified as a method to reduce in-person meetings and collectively practice social distancing.

Please fill out the following questions:

1. How can you be reached during this time? (please explain)

What contact information can you be reached (phone and email address)?

Will you have access to a computer with internet access?

Does the computer have:

a microphone?

speakers?

a camera?

2. Is the community already using a virtual service to conduct meetings? (e.g., Zoom, Microsoft Teams, Adobe Connect, or another service)
3. What kind of equipment or supplies would the community need to participate in a virtual meeting?
